## Why We Feature This Program:

As a museum, we respect and value the work of our teachers. Their work has lasting effects on students' abilities to understand the world. Because of this inspirational work, the Brick Store Museum is launching a program to offer free memberships to all York County teachers.

Not only are our county's teachers the conduits of knowledge for the next generation of lifelong learners (and museum-goers!), but this small effort for teachers aligns with our commitment to community engagement, personal connections to history and providing museum access to every person.
